

QUINTON KELSEY

Networking Specialist · AV Engineer · Systems Administrator

Oskaloosa, IA | 515-238-7591 | qkelsey23@gmail.com | linkedin.com/in/quinton-kelsey | quintonkelsey.github.io

PROFESSIONAL SUMMARY

Results-driven IT and AV professional with 9+ years of hands-on experience spanning network infrastructure, enterprise AV system design (Q-SYS), physical security (Genetec), systems administration, and Active Directory. Consistently steps into unfamiliar environments and delivers — from independently mastering Q-SYS DSP programming to being handed sole IT responsibility for an entire school district with no ramp-up time. Takes full ownership of projects from initial design through final commissioning, communicates clearly with clients, contractors, and non-technical stakeholders, and finds ways to make every team more efficient. Actively leverages AI tools and automation to accelerate workflows and solve problems faster.

EDUCATION

Southern New Hampshire University (SNHU)

Associate of Science — Computer Science | 2025 – Present

3.5+ GPA

Des Moines Area Community College (DMACC)

Computer Sciences | 2022 – 2023

CORE COMPETENCIES

✓ Q-SYS AV Design & Programming	✓ Genetec Security Platform	✓ Active Directory Administration
✓ Switch Configuration & VLANs	✓ Structured Cabling / RJ45 / Cat5/6	✓ Server Administration & Rack & Stack
✓ Network Troubleshooting (TCP/IP, DNS/DHCP)	✓ Project Submittals & Documentation	✓ AI Tools & Workflow Automation
✓ Lua Scripting / PowerShell / Python	✓ Multi-Site IT Operations	✓ Rapid Technology Adoption
✓ Customer & Stakeholder Communication	✓ Self-Directed Learning & Initiative	✓ Team Leadership & Coordination

KEY PROJECTS

- **Musco Corporation — Multi-Site AV Renovation:** Led Q-SYS AV system design, programming, submittal production, and commissioning across multiple Musco Corporation facilities throughout Iowa.
- **Adventureland Waterpark — Q-SYS Platform Conversion:** Converted full legacy AV infrastructure to Q-SYS platform — system design, equipment scheduling, submittal documentation, and on-site commissioning.
- **Cargill — Genetec Security Implementation & Training:** Led implementation, daily monitoring, and staff training of the Genetec physical security and surveillance system at the Cargill facility.
- **Mahaska County Courthouse — AV System Design:** Designed and installed AV systems for the Courthouse including the Judge's quarters — full design, documentation, and commissioning.
- **Moulton School District — IT Program Management:** Served as sole IT lead for the 2025–2026 school year; managed Active Directory, network infrastructure, cameras, and device support district-wide.
- **Physical Core Redundancy:** Assisted with implementing site-wide redundancy safety protocols for switches and network devices across a large multi-site deployment.

PROFESSIONAL EXPERIENCE

Mahaska Communication Group (MCG) · Networking Specialist & AV Engineer

September 2024 – Present

- Design, engineer, and commission enterprise AV systems using Q-SYS across multiple Musco Corporation sites throughout Iowa — taking full ownership of system architecture, DSP programming (Lua scripting & block controller), signal flow, submittals, and on-site commissioning.
- Executed full Q-SYS platform conversion at Adventureland Waterpark, replacing legacy AV infrastructure from design through commissioning.
- Produced complete project submittals from scratch — system block diagrams, equipment schedules, rack layouts, and technical specifications delivered to clients and general contractors.
- Trusted as sole IT lead for Moulton School District (2025–2026 school year) — hit the ground running with zero ramp-up time, administering Active Directory, troubleshooting network issues, maintaining security cameras, and supporting staff and students district-wide.
- Led implementation, daily monitoring, and administration of the Genetec physical security and surveillance platform at Cargill and other sites; trained team members on configuration and operation.
- Designed and implemented AV systems for Mahaska County Courthouse including Judge's quarters — handling full system design and installation.
- Assisted with Physical Core Redundancy project — implemented site-wide safety protocols for switches and network devices.
- Configure switches (Cisco & others), administer servers, perform RJ45/Cat5/Cat6 termination, and execute full rack & stack builds from the ground up.
- Leverage AI tools and automation to streamline workflows, accelerate troubleshooting, and improve team efficiency.
- Coordinate scheduling, ordering, and job preparation across multiple concurrent projects; provide informal team leadership across site-wide deployments.

MTI – Mobile Technologies Inc. · Field Technician (Part-time)

March 2021 – November 2022 · Ankeny, Iowa

- Deployed and serviced IT hardware and mobile technology systems at client locations throughout Iowa — including OS/software updates, SentinelOne security installations, and hardware refreshes.
- Managed all data entry and client records in Salesforce CRM, improving coordination and data accuracy across the team.
- Assisted with enforcing and implementing training programs for new deployments.
- Coordinated directly with senior management on scheduling and issue resolution; delivered consistent customer satisfaction.

Tod Kelsey Masonry · Customer Service Representative & IT

July 2016 – February 2025 · 8+ Years

- Owned all internal IT responsibilities for the full tenure — hardware procurement, setup, troubleshooting, data entry, billing, and ongoing maintenance.
- Managed all client communications and front-line customer service for a high-volume operation — consistently keeping clients informed and satisfied through complex projects.
- Sole internal IT resource — bridged communication between management and clients, ensuring smooth project coordination and on-time completion.
